DETAILED ACTION

1. This Office Action is in response to the applicants' communication received on January 18, 2008.
2. Claims 1-47 are presented for examination.
3. The applicants have amended claims 1, 30, and 47. The applicants have not cancelled or added any new claims.
4. Applicants' arguments with respect to claims 1-47 have been considered but are deemed to be moot in view of the new grounds of rejection.

Remarks

5. The Examiner acknowledges the applicants' amendment to the limitations of claims 1, 30, and 47. The applicants have included claim language to suggest that the limitations comprising the role of information is installed on a computing device, however the limitations do not appear to suggest what functionality the role has as the role is installed on a computing device. This concern has been further addressed in the Examiner's rejection presented below.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1, 30, and 47 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are the functionality the role has as the role is installed on a computing device. What purpose does the role have for being installed on the computing device?

In the applicants' published document, publication no. 20050198243, at paragraph 0049, the installation of the role refers to the implementation of one or more configuration files configured from information comprised from the role assignment.

The remaining claims are dependent claims. These claims are also rejected for being dependent on the above rejected independent claims.
